SPAULDING ROSE NO. 4

RED POTATO

See Illustration on Front Cover

This Potato originated in Steuben County, being introduced by the late S. T. Spaulding, of Avoca, N. Y., and is one of the most productive yielders. Tubers average large, of medium length, more or less flattened or oval; a light pink or flesh-color. Eyes are medium to large and shallow. An excellent table Potato, and is grown in the Celebrated Hastings, Florida, district for early shipments to northern markets. We make a specialty of this variety of Potato on account of its heavy yielding quality and satisfactory results obtained throughout the South. We recommend this Potato very highly.

UNITED STATES DEPARTMENT OF AGRICULTURE
FEDERAL HORTICULTURAL BOARD
WASHINGTON, D. C.

November 30, 1914.

Dear Sirs:

In reply to your letter of the 27th instant, I beg to state that the following press notice with reference to the freedom of western New York from powdery scab was sent to the Washington correspondents of the New York papers and of the five press associations on the 25th instant:

WESTERN NEW YORK APPARENTLY FREE FROM
POWDERY SCAB OF POTATOES

"The Department of Agriculture has authorized the statement that there is as yet no evidence of the presence in western New York of the powdery scab of Potatoes. A careful survey of twenty points in Genesee, Livingston, Monroe, Ontario and Steuben Counties, involving an examination of over 153,000 bushels of Potatoes, showed them to be entirely free from powdery scab, and with remarkably little common scab. A quarantine was recently placed against Clinton and Franklin Counties, in the northeastern corner of the state, on account of this disease, but there is nothing to indicate infection in other counties.

"This finding confirms the negative results of the searches made in this section last year by representatives of the Department of Agriculture and the State Experiment Station. A survey of the entire state is in progress."

Trusting that this meets with your approval, I am

Yours very truly,

C. L. MARLATT, Chairman of Board.

GOLD COIN WHITE SPROUT

Vines vigorous, healthy, considerably branched; foliage heavy, medium green; stems light green; flowers abundant, white. Tubers large, short-oblong to oblong, broad, flattened; eyes medium in number and size, shallow to medium in depth; skin creamy white or buff-white, occasionally splashed with russet toward seed end, generally well netted. This is one of the exceptionally good yielders of Steuben County.

MORTGAGE LIFTER
WHITE SPROUT

An exceptionally good-yielding Potato, with characteristics somewhat similar to the American Giant. It does not grow so long and is more of an oval shape.

D. W. SHULTS & COMPANY · AVOCA, NEW YORK

SIR WALTER RALEIGH
BLUE SPROUT

Considered one of the best of the late Mr. Carman's introductions. It is round, long in shape and very uniform as to size. This is one of our best-yielding late Potatoes.
